

Your Cats Happy & Safe ...Outdoors

CAT CONTAINMENT SYSTEM

Finally Cats Can Safely Enjoy the Outdoors...

Purr...fect Fence cat containment systems safely keep cats within a designated area. Now even escape artist "Houdini" cats can enjoy the great outdoors without you worrying about their safety. When installed properly, there have been no system failures, even with over 30,000 cats safely protected to date.

Happy and Healthy Cats

Purr...fect Fence is the product of choice for discriminating cat owners that recognize the many physical and psychological health benefits that access to the outdoors offers their cats. A recent veterinarian survey cited obesity as the greatest health issue for America's 75 million cats. The change of scenery associated with being outdoors in a safe environment can also significantly enhance the overall quality of your cat's life. Like people, cats enjoy a balanced lifestyle, and when happy, are usually healthy too.

A Whole New World in a Safe Environment

Cats love to roam and play outside. They also benefit from an outdoor living area, as it provides a pleasant change to the limited space found indoors and can improve the physical and mental well-being of your animal(s)

New Systems. New Options. New Accessories.

As always, Purr...fect Fence can cat-proof your existing traditional fence or wall with our Existing Fence Conversion System or create a free-standing cat-proof fence enclosure within your yard with our Free-Standing Cat Containment System. We now also have smaller, completely contained systems for locations where our perimeter fence systems are not the best fit. We now have a Purr...fect system for almost any circumstance! To read more about our fence alternative options, turn this brochure over, or better yet, visit us at PurrfectFence.com

Purr...fect Fence Systems Benefits:

- **Peace of mind that your cat(s) are safe & secure**
- **Happier & healthier cats**
- **Minimal visual impact to your property**

Free-Standing System

Because Purr...fect Fence is affordable and easy to install, some of our clients enclose their entire properties. Alternatively, many customers enclose a smaller area making a large "outdoor room" for their cats (a single 100' Free-Standing kit can make an enclosure over 1,000 square feet in size using the back or side of a house as one of the sides).

The arched over top of the fence seen from the inside of an enclosure.

The Free-Standing Fence is a two part system where the upper section is constructed from a very strong 7.5' high UV stable polypropylene mesh grid that arches up and attaches to the Cat-Proof™ pivoting extenders. The lower portion is a rodent-proof galvanized and powder coated steel mesh that

BlackJack enjoying the outdoor in his Purrfect Fence.

matches the grid of the upper section. Both of these materials get attached to the vertical support posts.

The patented Cat-Proofer™ Pivoting Fence Extensions form an arch at the top of the fence 31" over the fenced area. The pivoting action is spring actuated which will safely drop climbing cats off the pivoting section and them "spring" right back. The rodent barrier is flared onto and pinned securely to the ground with included stakes making it impossible for a cat to squeeze or dig under the fence. The posts are secured in easy to drive ground sleeves so no digging is required. All the materials are black so the enclosure disappears into the background. The system can be set at 6' for those with fence height restrictions or set as high as about 7'.

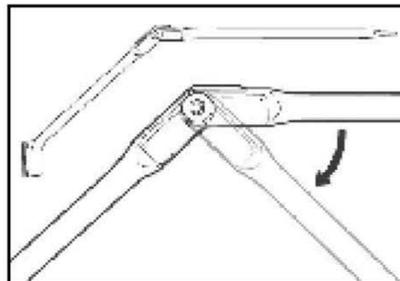

All the components of a 100' Free-Standing Fence Kit.

We offer access gates in a 30" width (suitable access for people, push mowers, wheel barrows and the like) and an extension kit to make a 30" gate 60" wide (suitable for most ride-on mower and lawn tractors). Our access gates do not require posts and are easy to assemble and install. If you require a large gate please contact us with your needs.

Top: Our ground stakes (1/4" thick x 12" long) are used to pin the rodent barrier to the ground every 2'. Right: Pivoting action of the our patented Cat-Proofer™ pivoting fence extenders

30" wide gate

60" wide gate

Existing Fence Conversion System

The Existing Fence Conversion System is essentially the top of our Free-Standing System secured right to YOUR existing fence. We use the same patented Cat-Proofer™ Pivoting Fence Extenders paired with universal mounting brackets making it simple to secure them to many kinds of fences including wood, PVC, chain link, decorative iron/aluminum and walls. The Existing Fence Conversion System will secure fences/walls 5' and higher. The Conversion System for Shorter Fences can catproof fences and walls as short as 3' high!

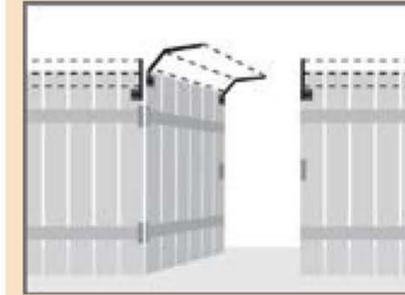

Clockwise from top left: Conversion System for Shorter Fences making a 4' chain link fence 7' high, Conversion System on a 6' stockade fence set at 6' high, all the components of a 100' Existing Fence Conversion Kit, Conversion System on a wood privacy fence.

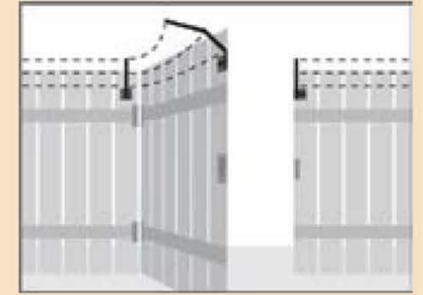

Conversion System on a PVC fence using a PVC/Wall Kit to secure the bottom edge of the poly mesh to the fence.

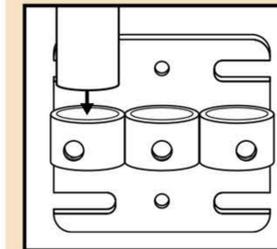

Conversion system on a Chain Link fence using U-Bolts to secure the arm mounting plate to the round posts.

Conversion System outward opening gate.

Conversion System inward opening gate.

The Conversion System mounting plate has slots to fit U-Bolts for round and square metal posts and holes for screwing to wood and masonry. The three rings allow the arm to be set on one side or the other of the plate for gates and fence end points. The arm can also be oriented at almost any angle from the plate for corners.

Combination of Both Systems

Conversion System transitions into Free-Standing System to exclude the tall evergreens that would otherwise be in the way of installing Conversion System on that section of wood fence.

Purrfect Playpen

The **Purrfect Playpen** essentially a 2-person tent (51" wide x 74.5" long x 40" high) made almost entirely out of the sturdy mesh used as the windows of high quality cat carriers approved by airlines. The square mesh has 3/32' openings which make it screen-like keeping out all but the smallest bugs. This tent has the added benefit of roll-down sunshades on all four sides. The Playpen packs into a small duffle bag and weighs less than 10lbs.

Purrfect Penthouse

For those with very small yards or extreme predator issues, we are now offering an all-metal, completely enclosed pen! This pen has galvanized steel tubular framework finished in a black powder coating and is completely covered with galvanized and black powder coated steel fencing. It measures 7.5' wide by 15' long with 6'2" head room and comes with a built-in gate.

The lengths of tubular steel making up the frame of the Penthouse are secured with welded steel 3-way and 4-way connectors. The vertical posts are held securely in the ground with the same sleeves used in our Free-Standing system and the bottom rails are tied together with custom steel clamps. Custom sizes and configurations are possible with this product. Please contact us with your needs.

The Dog-Proof[™] Fence Extension Systems will stop climbing and jumping dogs in their tracks. Imagine the peace of mind of letting your dog out and not have to watch him constantly. Imagine how much happier you both will be when you can let him out without having to chain him. Secure your fence with a Dog-Proof[™] System and you will have the peace of mind you deserve.

The Houdini-Proof Dog-Proof[™] System is designed to climb-proof virtually any type of fence or wall 4' or taller. The arms secure to your fence posts or wall and a very strong poly or metal fence material is stretched between the arms.

The Standard Dog-Proof[™] Kit for 100', designed to stop jumping dogs, utilizes our straight fence extensions to make your fence up to 3' taller. The fence extensions are 1 3/8" by 16 gauge galvanized steel finished with a high quality black powder coating. Welded to the arms are two mounting plates that work on any flat post, wall or fence surface.

Featured Projects

THE MY CAT FROM HELL SHOW

When the show's host, Jackson Galaxy, feels a cat will greatly benefit from time outdoors and the space is available, he knows Purrfect Fence will create the safe outdoor haven needed for his clients. Our Free-Standing

and Conversion systems were featured on two episodes in season 4 and our Purrfect Penthouse was featured in the the Helliday Special in the current Season 5. The new portable Purrfect Playhouse will be featured in an episode later this season... Keep an eye on our site for airing times and updates.

HEMINGWAY HOME & MUSEUM, KEY WEST FL

Our famous polydactyl (6 toed) decendants of Ernest Hemingway's own cats have always had the occasional wanderer in their ranks... Recently it has become an issue. In fact it became such

an issue that we were being threatened with having to cage our wonderful cats.

Dr Terry Curtis, renowned veterinary behaviorist and professor at University of Florida recommended that we secure our property perimeter with Purr...fect Fence. We took her advice and installed the fence earlier this summer. Our cats have been safely and happily contained ever since.

Other than how well it works, the fantastic thing about the product is its incredibly low visual impact. Thanks to Purr...fect Fence all 60+ of our feline friends are safely enjoying the great outdoors.

Mike Morawski CEO, Hemingway Home & Museum

Our Company...

Purr..fect Fence is a family owned company supplying unique and effective pet containment systems and accessories for over a decade. We service the USA and Canada directly, have distributors in the UK and Europe, and are proud to say that we have systems on every continent but Antarctica.

We hold two patents on our cat fencing products and are always improving and adding to our offerings. We pride ourselves in providing our clients with high quality, problem solving products. Please do not hesitate to contact us for advice on providing your pets a safe outdoor space. We are happy to help.

Visit us online and see our solutions for dogs escaping over existing traditional fences and walls.

Happy Customers

"When we moved to our new home four of our cats started to spray in the house. They have had Purr...fect Fence for a year now and have never escaped. We love the fence as it blends into the landscape. We are happy and our cats are happy! Life is good!"

Dr. Lynne Riley DMV, New Jersey

"Our cat, Moose had managed to defeat every fence I was able to devise. Moose performed feats of acrobatics that I was always told were impossible for cats, such as hanging upside-down by all fours. He has been completely defeated by your product, despite his persistent attempts to escape!"
